

Nlyte Services

Leverage our Experience in DCIM

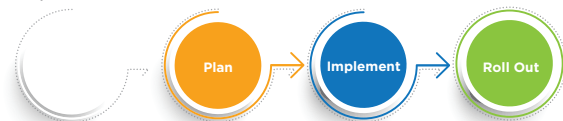

As a purchaser of data center infrastructure management software, as with any enterprise software purchase, you are eventually faced with the need to create an execution plan for a successful deployment. Consider using Nlyte's Professional Services organization. While there are few guarantees in life, teaming with Nlyte's professional Services group increases the likelihood of success and can provide you the fastest return on your investment in DCIM.

In the deployments of strategic software solutions, the real metric of success is time-to-value. Enterprise DCIM software requires deployment, conversions, end-user training and the creation of a myriad of reports and dashboards required by each of your constituents. The last thing you want is a highly capable enterprise solution with the potential to dramatically affect your operational costs for computing, that becomes shelf ware due to a failed or incomplete DCIM deployment.

Nlyte Services: Defined and repeatable to get your DCIM running swiftly, mitigate risk, increase predictability and get faster ROI.

With Nlyte Services, our experience – derived from dozens upon dozens of DCIM-specific engagements – is brought to your project, so you benefit from it, every step of the way. Nlyte Services ensure clients get up and running quickly as our expertise has been honed from numerous DCIM engagements spanning a complete spectrum of size, configuration and complexity. The Nlyte team of highly skilled experts have experience covering everything from account management, deployment and knowledge transfer – all of which allows you to rapidly achieve your desired outcome.

Deployment Services - Properly set objectives and expectations with Kickoff and Planning. Meet those objectives with Implementation and Roll-out.

- Project planning for fast deployment
- Identification of critical steps and currently available information collection
- Get your DCIM running as fast as possible

Integration Services - Integrate with your other systems (CMDB, Change Management, Virtualization, Building Management Systems, etc.) – and maximize value.

- Leverage your investments in ITSM, BMS and other existing management systems
- Gain authoritative sources of truth
- Ensure your DCIM data can be leveraged

Audit Services - Thorough inventorying of your data center's physical assets and their interrelationships and locations.

- Through a combination of existing electronic records and manual audit, create a baseline model of the data center and all of its components
- Identify the make and model of every rack and IT infrastructure device currently in production
- Determine an on-going audit plan to confirm accuracy over time

Training Services - Customized and practical learning experiences with real-world examples: Standard, Advanced, BDM Workshop, Workflow, Dashboards, RDBMS reporting, and Cube Reporting.

- Gain user-level expertise in as little as a day
- Learn how to leverage the powerful Nlyte software
- Get the right set of training for your everyday users, administrators and super users
