

Nlyte Hosting Service

Unmatched Flexibility

DATA SHEET

What is Nlyte Hosting Service?

Nlyte Hosting Service is an extension of Nlyte's Enterprise On Demand (SaaS) offering and gives customers flexibility on ways to purchase, configure and manage the solution.

The new Nlyte Hosting Service offers its licensed customers the flexibility to host Nlyte in their own environments or outsource the hosting to Nlyte, thus providing significant long term economic benefits and flexibility to an organization.

Nlyte Hosting Key Benefits

- Lower cost than maintaining the platform by customers themselves
- No need for underlying hardware and software components
- Predictable cost of the platform
- Pushing OpEx costs instead of CapEx
- Automatic updating of the application
- Increased flexibility in conducting business with Nlyte
- Massively scalable solution with VerAcode security certification
- Retain 100% ownership of data without hassle or expense of managing underlying components

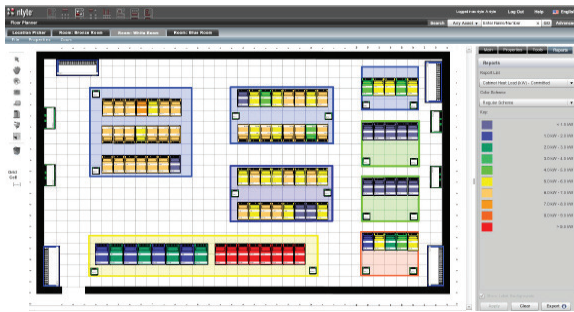

Nlyte Hosting Key Features

- DCIM industry's only central repository of contextual data center asset information and interrelationships
- Patented asset placement optimization
- Sophisticated "what if" modeling supported by the industry's first integrated Business Intelligence engine
- Powerful, flexible workflow engine for daily operational and long-term asset lifecycle management
- Refined data-driven modeling and capacity visualization of data center asserts, space and power
- Complete power and network connection management
- Off-the-shelf integration with BMC, HPE, ServiceNow, VMware, Microsoft and Citrix
- Robust web services API for rapid integration to 3rd party apps

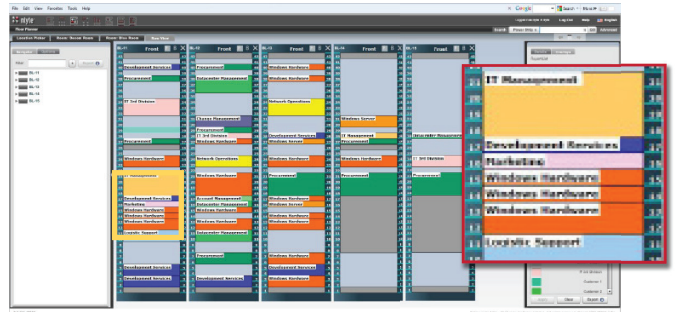

How Nlyte Hosting Works

Nlyte Hosting Service provides the entire environment where the customer's DCIM deployment resides-maintaining the server, network connection, software components and updates of Nlyte software. Customers no longer need to acquire and maintain these infrastructure elements.
